

Have you ever considered...

A Career In The Plumbing Industry?

Here's why you **SHOULD!**

"Manufacturing is Cool"

Manufacturing is part of the very fabric of our country, helping to grow the economy by generating productivity, stimulating research and development, and investing in the future. Manufacturing has a positive effect on "personal" economics as well. Manufacturing employees make 20% more than the average wage. Some of the greatest minds throughout history have made their mark in the world of manufacturing through their inventions and solutions to finding "a better way."

Join the excitement!

Plumbing Manufacturing is the Coolest!

Enhancements in the plumbing world have had and continue to have a significant impact on the improvement of our health and safety. Though you may take it for granted, plumbing touches your life every day! Think about it!

Plumbing Manufacturing Companies Offer A Myriad of Opportunities In a variety of concentrations...

Accounting	Import/Export
Administration	Manufacturing
Engineering	Marketing
Government Relations	Management
Human Resources	Sales

Challenging careers are available at all levels
from entry to executive!

What Qualifications Do You Need?

There are countless and varied employment opportunities within plumbing manufacturing companies. Individuals can be exposed to all areas of business management, and there are always opportunities for career advancement. Chances are there is a niche for you, no matter what your area of study or expertise. Manufacturing positions provide opportunities for specialists and generalists alike. With an open mind, some talent and coaching, there is virtually no end to the possibilities

for your future growth and advancement. Plumbing manufacturing is often a component of a much larger corporation — offering excellent employee benefits, perks and exposure to countless challenges and opportunities, often in a variety of industries.

Opportunities Include...

Internships

- part-time, temporary positions, lasting from a few weeks to a few months

Part-time

- less than 40 hours per week, generally without employee benefits (vacation time, sick pay, medical insurance)

Full time

- typically 40 hours per week, generally includes a menu of employee benefits

Special interest, ad hoc projects

- specifically targeted positions generally for a limited timeframe. (research, market analysis, etc.)

Finding a Job — How Do I Start?

Your education is the first step toward a career in plumbing manufacturing — equally important, however, are networking, research and persistence. It may be tough not to get discouraged, but the reality is that the world is a competitive one and your success is directly related to your ability to stand out from the crowd in a positive way! You need to tap into your network of contacts (family, friends, teachers, associates) and maximize your unique attributes. Keep in mind that each company has a unique corporate culture. It is important that your personality and that corporate culture are complementary. You need to find the right "fit" in order to flourish.

It is important to keep an open mind and not box yourself into a narrow selection of possible career options. Internships are a wonderful way to sample various career paths and corporate culture. Contact PMI to explore the options.
